WHAT'S NEW • 2026

Open Foris Arena

A year of new features, from survey design to data analysis

Open Foris · November 2026

2026 AT A GLANCE

A year of steady releases

70

Arena releases

from v2.2.13 to v2.11.0

15

headline features

in the in-app “What’s new”

3

new interface languages

Portuguese, Japanese, Serbian

Arena · design, collect, clean and analyse data on the web, with Arena Mobile in the field

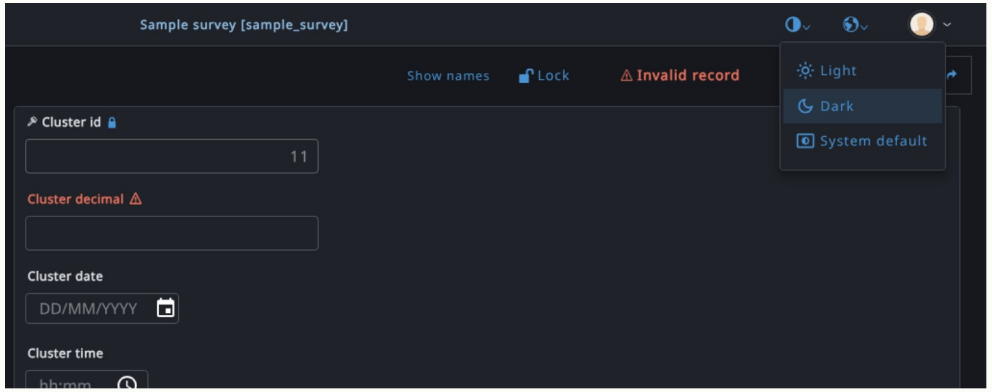

ARENA • EVERYONE

A fresh look: new dashboard and dark theme

New dashboard

Records, contributors and storage at a glance, a map of the data and the records trend.

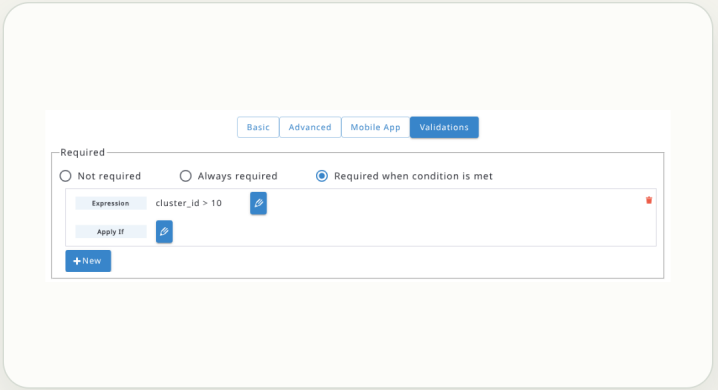

Light and dark theme

Switch from the header or the login page, or follow the system setting.

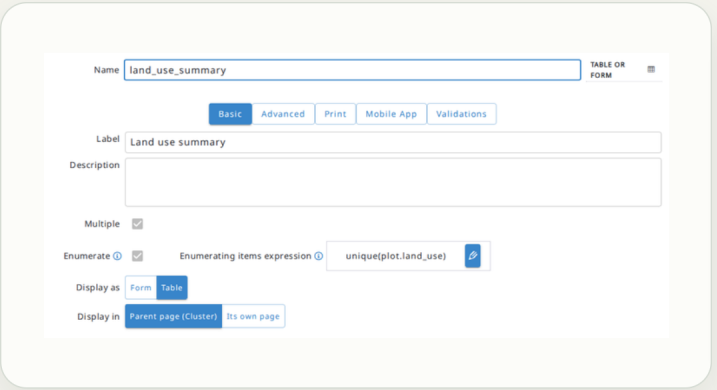

ARENA • SURVEY DESIGN

Smarter forms, less effort

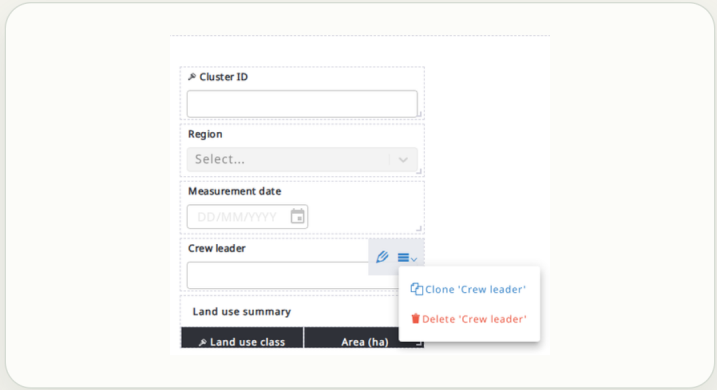

Required if

An attribute becomes mandatory only when a condition is true.

Dynamic enumerators

An expression decides which rows an enumerated entity gets.

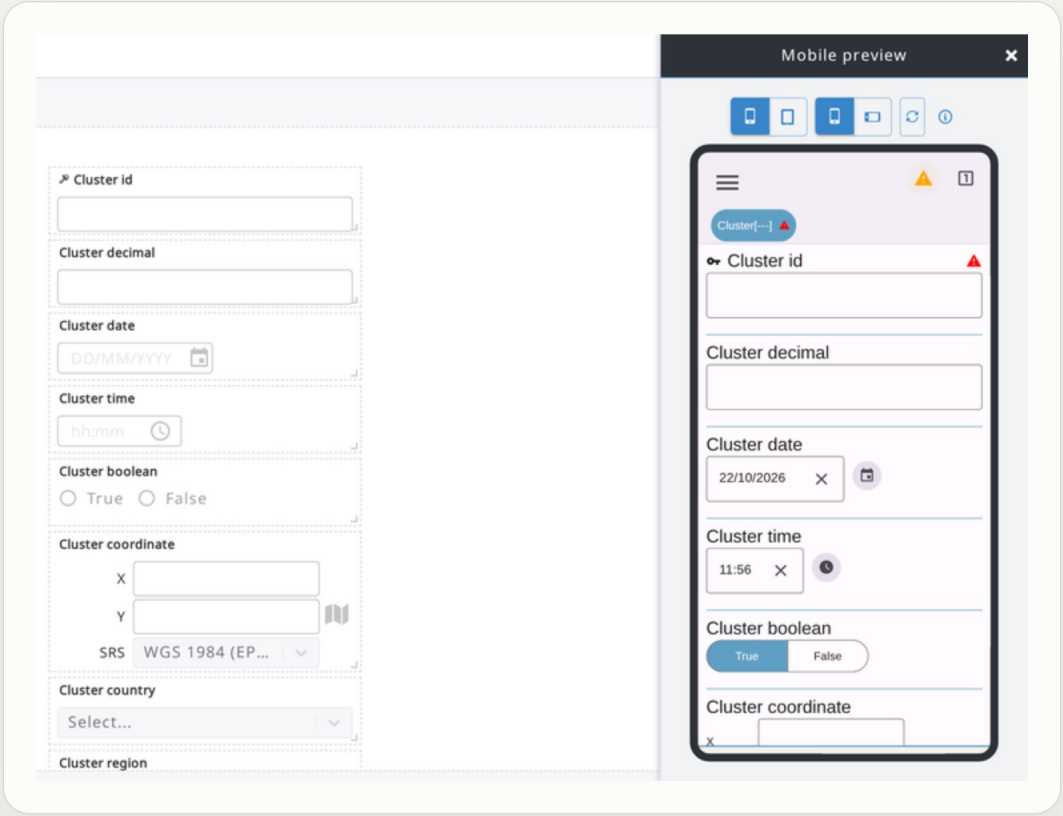

Clone attributes

Copy an attribute, with all its properties, into any entity.

Also: editable-if and visible-if · clone entities from another survey · publish warns about changes that affect existing data · time attributes with seconds

ARENA • SURVEY DESIGN

Preview your survey as it looks in Arena Mobile

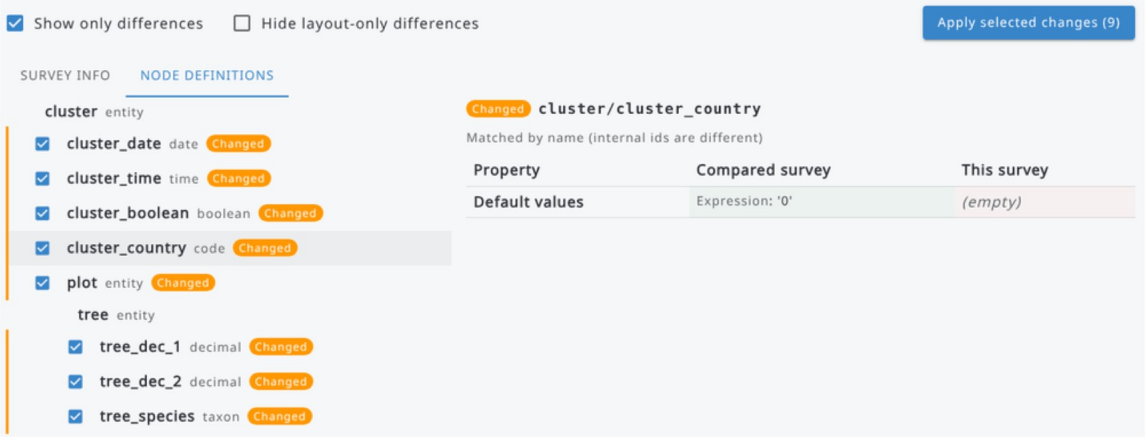

Open **Preview (mobile)** in the form designer and try the draft survey just as field teams will see it.

- Phone or tablet
- Portrait or landscape
- No device needed, it runs in the browser
- Available to every survey designer

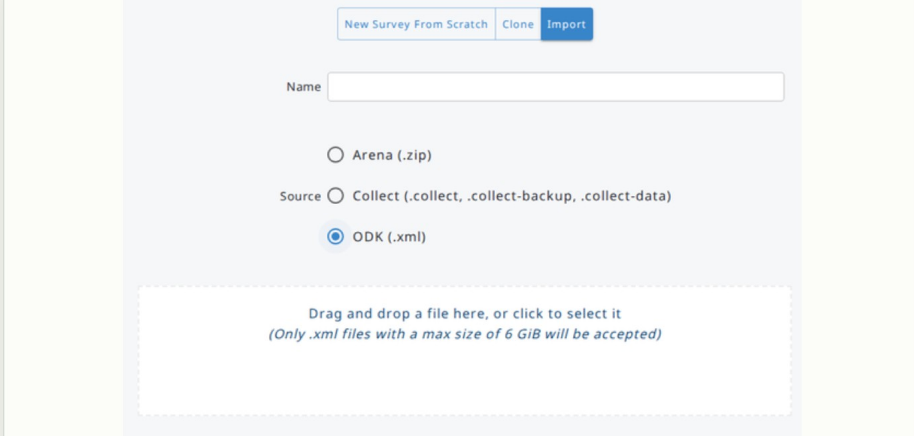

ARENA • SURVEY MANAGEMENT

Move surveys between servers and tools

Compare and update

Compare with a survey from another server (e.g. test → production) and apply only the changes you pick.

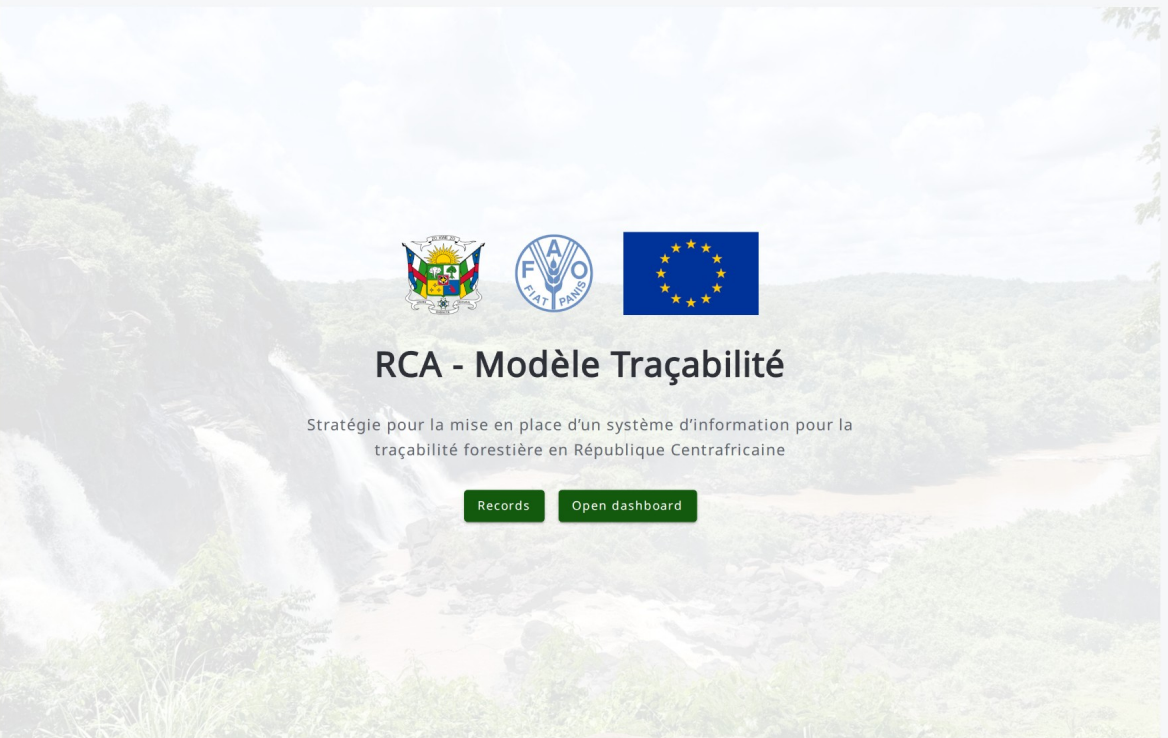

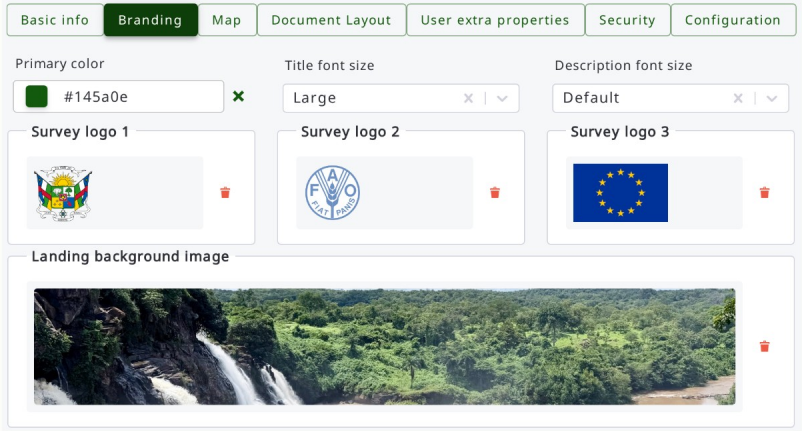

Import from ODK (beta)

Create a survey from an ODK form and import the data collected with ODK Collect.

ARENA • SURVEY ADMINS

Branding: each survey with its own look

- Up to 3 logos and a background image
- Primary colour applied to the whole app
- Title and description sizes, live preview

ARENA • DATA ENTRY

Print records, ready to file or share

Word or PDF
The whole record or the current page, portrait or landscape.

Follows the form layout
Same columns as the form; multiple entities become tables.

Pictures included
Photos and other images from file attributes are printed.

QR code
Scan the page to open the record’s PDF online.

Your letterhead
Header and footer images, optional conditions, page numbers.

National Forest Inventory 2026

Plot ID: 1042
Crew leader: Maria Rossi
Land use: [x] Forest [ ] Other wooded land [ ] Cropland
Survey date: 21/10/2026
Plot accessible: [x] Yes [ ] No
Notes: Mixed oak stand, dense understorey along the northern edge.
Plot location:
srs: 4326
x: 12.4964
y: 41.9028
Aerial view:

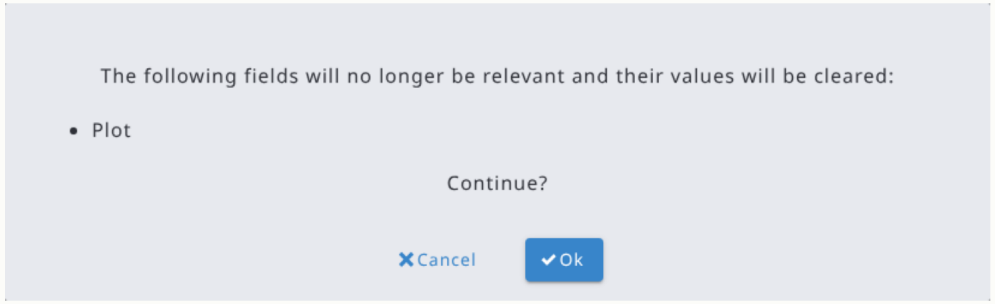

Slope (%): 12.5

Trees

Tree no.	Species	DBH (cm)	Height (m)	Health status
1	Quercus cerris	34.2	18.5	Healthy
2	Quercus pubescens	27.8	15.1	Healthy
3	Fraxinus ornus	15.4	9.8	Damaged
4	Acer campestre	21	12.3	Healthy

ARENA • DATA ENTRY

Cleaner data while you type

Non-relevant values cleared

When a change makes fields irrelevant, their values are cleared, after asking for confirmation.

- Export selected records in Arena format
- Selection kept when changing page
- Option to merge records with the same keys
- Minimum number of entities created automatically

ARENA • SECURITY

Safer access, finer control

Two-factor authentication

A code from an authenticator app at login; each code works only once.

QR code login

Sign in to Arena Mobile by scanning a code shown in Arena.

Group visibility

“Can view the records of”: read-only access to other groups’ records.

Access-aware exports

Record files, exports and mobile uploads limited to the records a group can access.

Data analysts

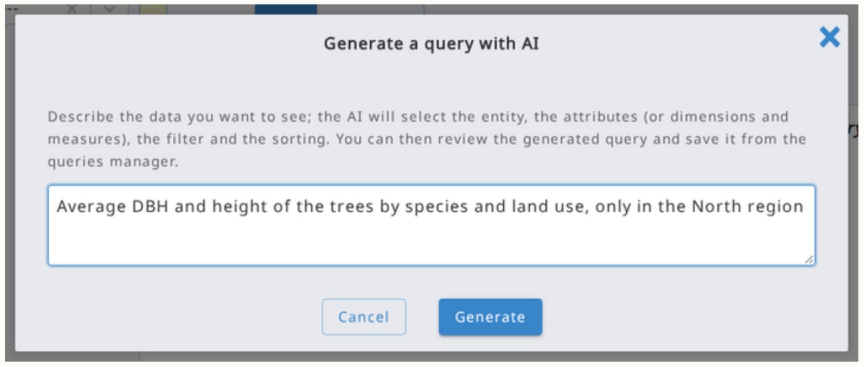

Survey option to let analysts see records they don’t own.

Hardened server

Request rate limiting and security updates all year.

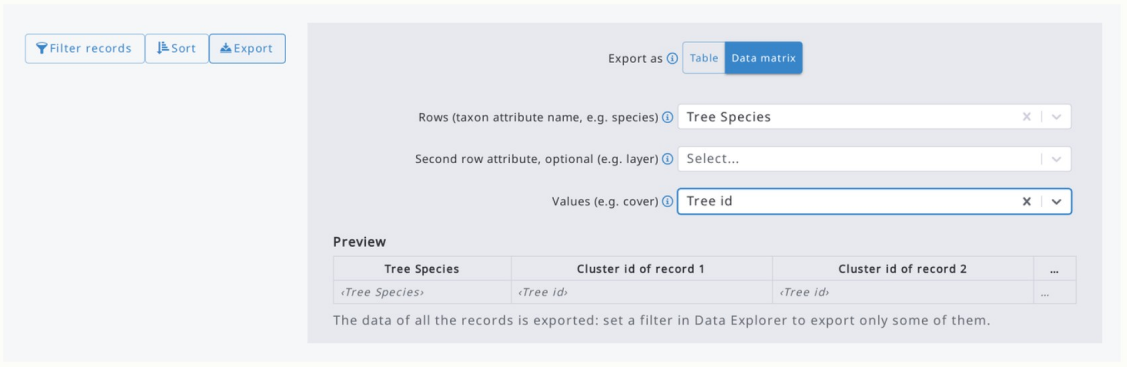

ARENA • DATA EXPLORER

Ask, explore, export

Ask AI *(experimental)*

Describe the data in plain language and AI builds the query, name and description included.

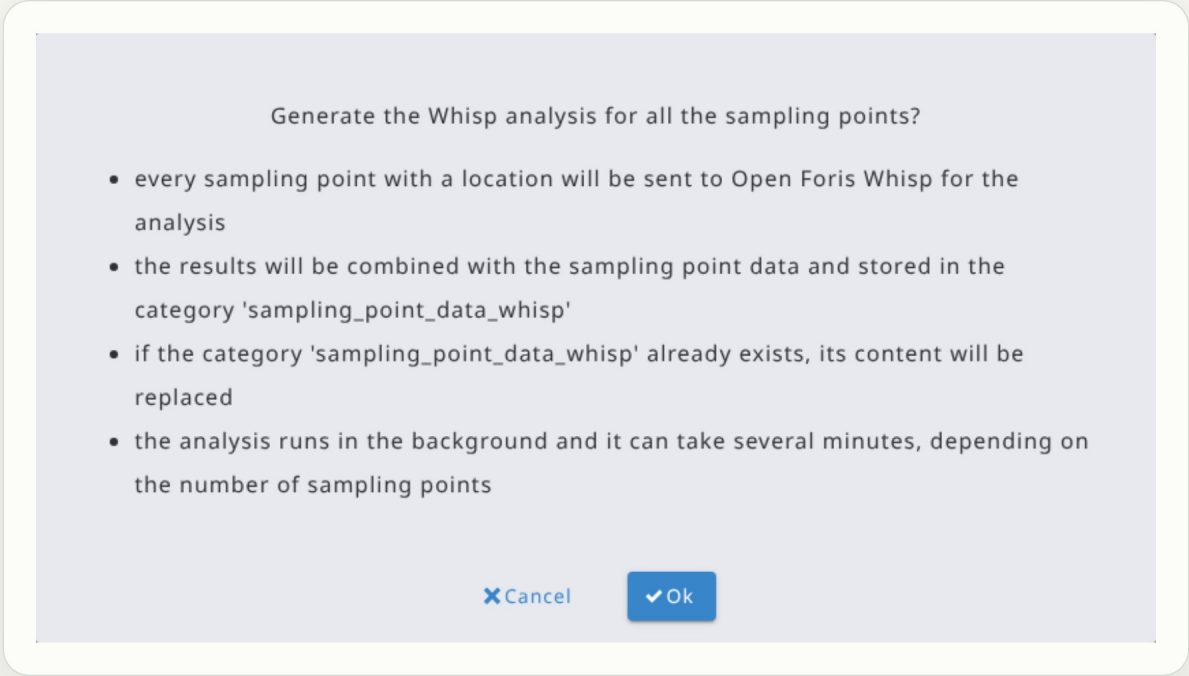

Data matrix export

Species × records tables, ready for Turboveg, Juice and Synbiosys.

Also: charts on large data sets (random samples that keep the outliers) · JavaScript filter syntax with text search · sort by clicking a column header

ARENA • ANALYSIS

Whisp analysis and richer processing chains

Whisp, in the background

Analyse every sampling point with Open Foris Whisp; results are saved as a new category.

Two-phase sampling

Now supported in the chain editor, with better sampling design settings.

Area files and templates

Area file (MAU) per cycle; clone chains from templates.

GeoPackage export

Export categories with their geometries.

UNDER THE HOOD

Faster where it matters

Minutes → seconds

to import Arena files with large records

Lighter records

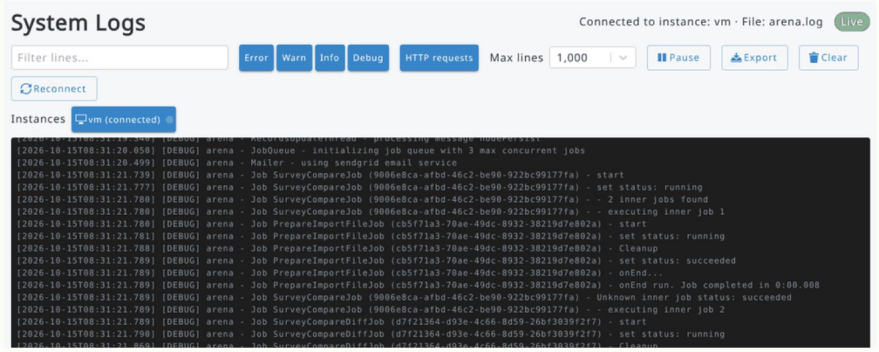

less database space and memory for large records

No duplicates

records merged by key on import and when they come from Arena Mobile

Plus faster record updates, data export and uploads from Arena Mobile.

Everything for system admins, on one page

- **System logs:** follow server logs live
- **Users backup / restore** between servers
- **Messages** in System Administration, also to survey admins only
- Email via **Amazon SES**
- Temporary files on **Amazon S3**
- Request rate limiting, single-use 2FA codes
- Activity log can be turned off
- Expired, never-activated accounts cleaned up
- Access request emails sent in BCC

Thank you
